

COMPUTER LITERACY

16-Dec-2015

Different types of memory (RAM,ROM)and about memory devices were taught to the students of class 8,9 and 10 with total strength 180 and also the teachers were taught using internet by our 20 volunteer of computer literacy. we also showed them the hardware and software components using Power Point presentation and videos. Tell children about simple uses of computer such as uses of various software in daily life .

A brief description on computer, its parts and functions were taught to the students of class 8 and 9 by our volunteers of computer literacy. The session was taken for 120 minutes by our volunteers in each class. The students were taught in a friendly environment with the help of PowerPoint presentation and videos. At the end of the class, 15-20 minutes were given for recapitulation of the topics taught and students were shown entertaining videos, played music and some of them danced.
