

COMPUTER LITERACY

10 –oct-2015

This is a government undertaking programme . Most of the Schools of Odisha, are found to have computer facilities without teachers and proper knowledge. So in the age of computers this project aims to solve the problems . Here various government schools are adopted and the NSS volunteers give computer education to students.

Revising about all the lesson that were taught to them in previous classes. Names of only advance parts of a computer. Opening and closing of various software present in the Desktop. we also showed them the hardware and software components using Power Point presentation and videos.
