Women face many social challenges today whether it is working in order to secure an income for her family to raising children amidst the harsh economic crisis. A woman is dynamic in the many roles she plays. Our volunteers under this project has adopted a village chillu tola near KISS. This project focuses on women empowerment, and to give them the basic education for a better future. Our volunteers give them knowledge and taught basics of different skills like drawing, painting, teaching, computer stitching and many more.

We interacted with the children and enquired about their development in studies. Children had drawn very nice drawings & in computer education we have taught Microsoft excel to ladies and girls .After then we have gone for survey .
