

## UDAAN

20-nov -15

We interacted with the children and enquired about their development in studies. In drawing and painting children had drawn very nice drawings & in computer education we have taught Microsoft word to ladies and girls .After then we have gone for survey .After the survey we came to know that the village condition is very bad and unhygienic and then we told village people about “swachh Bharat Aviyan” and motivate them to make their village neat and clean.
