The World Health Day is a global health awareness day celebrated every year on April 7, under the sponsorship of the World Health Organization, as well as other related organization to mark the anniversary of the founding of the **World Health** Organization and provides us with a unique opportunity to mobilize action around a specific **health** topic of concern to people all over the **world**.

It was celebrated by the NSS society by creating health awareness in the slum and explaining people about maintaining good health. Soaps and bleaching powder were distributed to people in slum.
