Dear Ma'am,

As you are aware that Jhpiego with support from USAID APS implemented a program for successful and sustainable improvement in quality of PSE in private nursing institutions across 6 states of India, and your institution was one among them. As a part of intervention, the training infrastructure of the institutions was upgraded to create an enabling environment for the nursing students. Access to well-equipped skills lab, computer lab and library was ensured for the students to promote competency based learning. Capacity building of the nursing faculty was undertaken through interventions through specialized (on-site / virtual) trainings.

As a part of this, an endline study was conducted to evaluate the effectiveness of strengthening nursing and midwifery pre service education in improving key maternal neonatal health (MNH) skills of student and faculty recently at your institution. Requesting you to kindly certify the same that the study was completed in the attached format in **the Institution letter pad with Principal Signature**.

Requesting you to Kindly share the scanned copy of the same with me. Please call me back for any queries.

Warm Regards,

Annie

Subject: Skill Lab Induction Training

Dear Madam,

As discussed earlier the "Skill Lab Induction Training" will be organised during 27<sup>th</sup> to 28<sup>th</sup> March, 2018 at your institution. Participants from other private institutes will also join the training. We might require accommodation for few participants, the details of which will be communicated soon.

We hereby request your cooperation and support for organising the same.

With thanks and warm regards

Dr Anita Anasuya  
State Team Leader, Odisha
