Dear Rajib
Please find the modified work, I rewrite the most of file and correct fundamental mistakes. (simply you have to insert the variable u_7 (phai) but you ignore it.
Any way I correct and rewrite the file up to line 110 page 6.
Then you have to reread carefully the file again up to line 110.
Then fixe and rewrite the remaining part.
Try to do as much as possible.

Kindly see my ways in writing in Latex file, so please use this ways.

Elbaz I. Abouelmagd

Respected Sir,

I hope you are doing well. After a long time I have returned to my research work. According to your suggestions I modified the manuscript. Kindly go through the attached file and tell me what should be done next.

Regards

Dr. RAJIB MIA,

Dear Dr Rajib
welcome back. I will get back to you soon.
Best Regards

Elbaz I. Abouelmagd
